Issue 2, April 2019

Irrigation System Start-Up Tips:

- Activate system to be running as soon as temperatures reach around 60 degrees
- Run system between rainfalls to get your lawn greening up
- If your system is not working properly have it checked out by our experienced technicians

April's Customer Checklist:

- **Schedule your irrigation start-up NOW!** Appointments are filling up fast. weather permitting.
- Call our Yard Department to find out our latest prices on mulch, stone, and soil. Once the weather breaks, **you will want to get your DIY supplies from Quality!**
- **Start thinking about your spring and summer flowers,** we will be purchasing our stock shortly!

April 22, 2019

Mowing Services Starting Soon!

It may not look like your lawn needs to be mowed yet. However, within the next couple of weeks you will see your lawn coming back to life. That is, of course, as long as Old Man Winter finally goes away as expected! As of right now, we plan on starting mowing services the week of April 15th. However, this is weather permitting. If you would like your lawn cut before that or want to hold off on mowing services, please call Kerri at 856-783-8833 x 11.

Typically, at a residential home, you will see a two man crew cutting, edging, spin trimming all obstructions, and blowing the property down. Also at each visit, the foreman will inspect the property for any tree, shrub, or lawn problems. He will take notes and someone will notify you of any problems found in an effort to get them resolved immediately.
