Crazy Summer Weather

June and July have made this one of the rainiest summers on record. It seemed like to rained every day. Not to mention, the two heat waves that arrived in July. All this crazy weather has sure been effecting our lawns. During the past couple of weeks you may have noticed your lawn being extremely wet due to the amount of rain we have had. You may also have noticed yellow spots on your lawn. These spots are most likely a fungus that has started to form on your lawn. Fungi form when the lawn is very wet and extremely hot. **Our recent weather conditions have made it very easy for your lawn to develop an unpreventable fungus.** We may have already notified you if we have seen a fungus on your lawn, however if we haven't and you think are may have a fungus please call our office as soon as possible.

Whether you have had a fungus this season or not, **we are recommending that every lawn receive a fall lawn renovation.** The summer months are very hard on your lawn. Let us help give your lawn some tender love and care. You will be receiving a proposal in your mailbox when we come out to do your next lawn care step. However, if you do not receive lawn care from us and are interested in this service, please contact us and we will be happy to come out and leave you a FREE estimate.
