Help Minimize Your Lawn's Chances of Getting a Fungus

Excessive humidity in the air can cause your lawn to develop a fungus. Sometimes it cannot be prevented. However, below are some ways to minimize the chance of getting a fungus:

1. Adjust your irrigation system to run early in the morning. Try not to have it run when the sun is out, especially when it is hot.
2. Inspect your lawn every week, note whether there are areas where the grass has discoloration.
3. Take notice of your neighbor's lawn, if their lawn seems to have a lot of discoloration keep a close eye on yours.

August Checklist

- ✓ I have set up an appointment for a supervisor to walk my property to discuss any questions or concerns I may have.
- ✓ I have liked Quality Landscaping's Facebook Page
- ✓ I have made a note to look for my Lawn Renovation Proposal when I receive Step 5 of my Lawn Care Program.
- ✓ I have been thoroughly enjoying the "dog days of summer"

Lawn Renovations are coming soon....

September and October is the best time for lawn renovations. This service includes thatching, aerating, and/or slice seeding of your lawn. It helps revive it after the long summer months. It will pull out any dead patches in your lawn. The lawn will breathe better and grow in healthier next spring. While we won't start doing this service until September, you will be getting a proposal this month with your next Lawn Care step. We will suggest what services of the Lawn Renovation program we think your lawn needs. If you are not a current Lawn Care customer, but are interested in this service please call our office today! **We highly recommend this service to all of our customers!**

Make your home look as good as new!

Pressure washing is one of the best hidden secrets to make your house look as good as new! This service can remove mold and dirt from sides of your home, pavers, or deck. Pressure washing can be done pretty much any time of year, weather permitting. We can schedule you for a free estimate. Typically, we will send a one or two man crew out to perform the service. If you have any questions, concerns, or would like to schedule an estimate please give us a call, 856-783-8833.
