

## Having a summer party?

If you are planning a summer party outdoors and need to spruce up your landscaping, we can help. We will be more than happy to touch up your mulching, re-edge beds, lightly trim your shrubs, etc. Putting a thin layer of new mulch into plant beds makes it look as good as new! Re-edging your beds can give your mulch beds a more defined look and make the flowers and shrubbery stand out. Lightly re-shaping shrubbery will add a manicured look to your property. We can easily provide you with these services to give your property a midseason face lift before your big event! Call to set up an appointment today, 856-783-8833.

## July Checklist:

- During a heat wave** that lasts several days, make sure to **adjust your irrigation system** to run longer to make sure your turf and shrubbery get the watering they need!
- Inspect your lawn daily** for any fungi or brown spots
- If you maintain your lawn yourself, make sure to **slightly raise the blade on your mower** to avoid burning your lawn out on hot days
- Make sure the blades on your mower are sharp. **Sharp blades are critical!**
- Enjoy your landscaping and the summer!**

## Irrigation Tips To Help Your Lawn:

- 1) Adapt your watering schedule to the weather and the season.
- 2) Familiarize yourself with the settings on your system so you are able to tell if it is not running correctly or if the settings need to be changed.
- 3) Water only when needed, **watering too much and too frequently results in shallow roots, weed growth and fungi.**
- 4) Water after sunset and before sunrise when winds are calm and temperatures are a little cooler. This will help reduce evaporation.

*We hope everyone has a happy and healthy 4<sup>th</sup> of July! God Bless America.*
