

Irrigation Is Key...

As the temperature starts to hit 85 degrees or above you need to have your watering system ready to go. If you have not already done so, you must make an appointment to have your system turned on and inspected! We understand that not every property has an underground irrigation system. However, you must have an alternative watering system in place. This could be an above ground sprinkler tied into to your hose or you can use your hose to manually water your landscaping. Please remember that if you do have an above ground sprinkler, you must keep moving around the property so all of the lawn and plant material gets watered! Please feel free to call our office with any questions or concerns, 856-783-8833 x 16.

Monthly Customer Checklist

- ✓ Check out the Quality Landscaping Facebook page
- ✓ When the weather warms up, make a note to adjust your irrigation system accordingly.
- ✓ Check your lawn for any discoloration or concerns. Call the Lawn Care Department to make us aware of any problems.

Trimming and Pruning Services

If you have not received these services yet, your property will be scheduled soon. However, if you would like this service to be done on a specific date, please call 856-783-8833 x 11. We will be more than happy to accommodate you! If you would like removal and/or replacement of any overgrown shrubs, we can give you a quote for this as well!
