

What to Know About Your Services This Month:

Weather permitting, mowing services will start to come to a close between the middle and end of the month. **If you have a preference of when you would like us to stop mowing, please do not hesitate to call.** If we do not hear from you, we will use our own judgment. When doing your fall clean-up, we will mow your lawn one final time so that it is low and even for the winter.

Fall clean-ups will start at the end of the month. However, it does depend on when the leaves start to fall. It's not too early to set up a date to have your fall clean-up done if you have a preference. Also, **if you still need a price for a clean-up, now is the time to call for the estimate.**

Monthly Checklist:

- ✓ I have called about a fall mum display at my property if one has not been installed already
- ✓ I had my lawn renovated to ensure it is as healthy as possible in the spring
- ✓ I have called to schedule my irrigation system winterization
- ✓ I have looked into when my township will be picking up my leaves and scheduled my fall clean-up accordingly

Quality's Seasoned Firewood
