October Updates:

Weather permitting, mowing services will start to come to a close between the middle and end of the month. **If you have a preference of when you would like us to stop mowing, please do not hesitate to call.** If we do not hear from you, we will use our own judgment. When doing your fall clean-up, we will mow your lawn one final time so that it is low and even for the winter.

Fall clean-ups will start at the end of the month. However, it does depend on when the leaves start to fall. It's not too early to set up a date to have your fall clean-up done if you have a preference. Also, **if you still need a price for a clean-up, now is the time to call for the estimate.**

We have sent many reminders out about scheduling you irrigation winterization. **We stress the importance of this because our schedules fill up fast and this service needs to be done before the cold weather hits.** Once it starts to get cold at night you can run the risk of your pipes freezing and that can be very costly!

October Customer Checklist:

- ✓ Call the office at 856-783-8833 x 16 to schedule your **irrigation system winterization**
- ✓ Send back your **Fall Lawn Renovation** proposal. It will help your lawn tremendously, make sure to coordinate it with your irrigation winterization. It's not too late!
- ✓ Look into **Quality's firewood selection** and prices to get prepared for the chilly nights ahead
- ✓ Join **Quality's Facebook page** at facebook.com/qualityland

Fall Mums have arrived!

Our mum selection has arrived. If you are interested in having mums planted at your home, please contact us right away. Mums are a great and easy way to decorate your landscaping for the fall season. They add that extra fall color to your yard. If you have any questions or concerns regarding mums, please feel free to call Tim at 856-783-8833 x 20.
